SUMMARY

Driven and creative Frontend Engineer with a passion for crafting engaging, user-centric web experiences. Skilled in modern technologies like ReactJS, NextJS, TypeScript, and Tailwind CSS, I excel at transforming complex design visions into sleek, high-performing websites and web applications. With a keen eye for detail and a commitment to intuitive UI and seamless UX, I consistently deliver visually stunning and technically robust solutions that leave a lasting impact on users.

PROFESSIONAL EXPERIENCE

Frontend Engineer

09/2024 - Present

TIMA: Influencer Marketing Agency in Lagos, Nigeria

Lagos, Nigeria

- Implementing a web app, and converting UI designs to reusable components.
- Collaborating with different team members spanning across project manager, product manager, product designers, and backend developers.

Frontend Developer

12/2023 - Present

Analytics Intelligence

Lagos, Nigeria

- Developed chatbots integrated across company websites to enhance product discovery and facilitate user interaction, including scheduling calls with customer representatives.
- Contributed to the implementation of a certificate validation system for AI Academy students.
- Handled the revamp and redevelopment of the global company website, improving user experience and performance.
- Built reusable UI components, ensuring maintainability and consistency in existing codebases.

Frontend Engineer (Volunteer)

06/2023 - Present

Edustipend

California, United States

- Developed a donation and referral leaderboard, providing users real-time updates on campaign progress for the **#EdustipendAt2** and **#SupportALearner** campaigns.
- Implemented a user dashboard, enabling users to monitor their application status.
- Collaborated closely with the team to redesign and revamp the company's website, enhancing the overall user experience.

Frontend Developer (Intern)

09/2023 - 12/2023

Uptick Talent

Nigeria

- Led the development of 90% of the company's capstone project, which now serves as the official website, live in production. [Uptick Talent](#)
- Built and optimized the landing pages and admin CMS interface, ensuring intuitive user interactions and streamlined content management.
- Converted complex Figma designs into functional, interactive, and responsive UIs, ensuring a seamless user experience.

EDUCATION

B.Sc. Biochemistry

2016 - 2021

University of Ilorin

Ilorin, Nigeria

PROJECTS

OurSpace Platform

Developed an MVP within two months for OurSpace, a platform for booking short-let homes, including a fully functional admin portal. [Explore OurSpace](#)

Access Care Platform

Collaborated as one of two frontend developers on Access Care, a telemedicine platform that facilitates virtual healthcare consultations. [Access Care](#)

Hng Internships

Participated in HNGX (2023) as a frontend developer and HNG11 (2024) as a backend developer, enhancing my technical skills and working collaboratively in team environments.
